**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-57, drawn to a device, classified in class 604, subclass 57
- II. Claims 58-108, drawn to a method of removing or converting a constituent-of-interest in a gastrointestinal tract, classified in class 604, subclass 500.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as a method of removing or converting or binding in a blood vessel or ex vivo.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required

Art Unit: 1641

because the inventions require a different field of search (see MPEP § 808.02),  
restriction for examination purposes as indicated is proper.
